The screenshot shows a web browser with the URL `localhost:4200/platos`. The application, titled "PLATOS", has a form with three input fields: "64af6615dccb8dca11bd2a59", "Sneakers", and "250". Below the inputs are two buttons: "Guardar" (disabled) and "Cancelar".

Below the form is a table with the following data:

ID	Nombre	calorias (4 digitos)	
64af6578dccb8dca11bd2a54	Encebollado	300	<button>Eliminar</button>

The right side of the image shows the Chrome DevTools console. The "Warning!" message is visible, and the console output shows the state of the application after a save operation:

```

```

The screenshot displays the MongoDB Atlas web interface. The top navigation bar shows the user is logged in as 'luis' and has access to various tools like Clusters, Help, and Billing. The main content area is divided into a sidebar on the left and a main panel on the right. The sidebar contains sections for 'Project 0', 'Data Services', 'App Services', and 'Charts'. Under 'Data Services', the 'Database' section is expanded, showing a list of databases: 'caloriaslc', 'pacientes', 'platos', and 'registros'. The 'platos' database is selected. The main panel shows the 'Find' tab for the 'platos' database. It displays a list of documents with fields like '_id', 'nombre', 'status', 'calorias', and '__v'. The first document is for 'Encebollado' with 300 calories, and the second is for 'Sneakers' with 250 calories. The interface is clean and modern, with a blue and white color scheme.
